

Logging & Monitoring Policy

What we log, how we monitor for security events, and how long logs are retained.

Version: 1.0 · **Last updated:** January 2026 · **Owner:** Security Lead

1. Purpose

To ensure security-relevant events are logged and monitored so issues can be detected and investigated.

2. Scope

The Backpack OS platform, cloud providers, source control, and applications we operate.

3. Logging

- We collect logs of authentication, access, and administrative actions where available.
- Logs are protected against tampering and retained for a period sufficient for investigation.

4. Monitoring & alerting

- Alerts are configured for security-relevant events and availability issues.
- Access and activity are reviewed periodically.

5. Review

This policy is reviewed at least annually.
